

**PLANET**  
ACCESSORIES AND SPARE PARTS

|   | <b>DESCRIPTION</b>   | <b>Ø</b> | <b>REF.</b>     | <b>USE</b>   |
|---|--|----------|-----------------|--|
|    | STAINLESS STEEL<br>SEPARATOR TANK (100L)                                   | 460      | VP07253         | For extraction of large quantities of dust and to prevent fast filters clogging. An additional anti-foam device adds the capacity of extracting liquids. |
|    | STAINLESS STEEL<br>SEPARATOR TANK (100L)<br>FOR INCANDESCENT<br>SUBSTANCES | 460      | VP07254         | Separator allowing quick extraction of ash or similar substances that may still contain hot embers (for us, place about 20cm of water into the tank)     |
|   | BI PHASE MOTOR<br>220-230V   |          | VP03976<br>SA   | Innovating motor featuring an aluminium-bearing flange. Recommended for residuals containing large quantities of fine dust.                              |
|  | TRI PHASE MOTOR<br>220-230V  |          | VP06425<br>SA   | Innovating motor featuring an aluminium-bearing flange. Recommended for mixed liquid/solid residuals.  |
|  | BI- AND TRI PHASE<br>MOTOR GRAPHITE  |          | TOGB<br>VP00839 | Replacing graphite is extremely important whenever it shows fast wearing. This operation extends the motors life span.                                   |
