

QUICK START GUIDE: ELECTRIC COLD WATER BLASTERS

SAFETY MANAGEMENT PROCEDURES

- This machine can cause severe injury if the water jet is pointed at any party of the body.
- ALWAYS wear protective goggles and suitable protective clothing when operating appliance. Non-slip rubber footwear must be worn when operating the machine.

START UP PROCEDURES

- 1) Ensure gun and lance are connected.
- 2) Connect water blaster to and turn on water supply
- 3) Check for leaks
- 4) Check oil level in pump – oil should sit in the centre of the sight glass
- 5) Pull trigger on gun and turn **ON** the on /off switch
- 6) **NEVER LEAVE THE MACHINE RUNNING WITHOUT THE TRIGGER PULLED FOR MORE THAN 1 - 2 MINUTES!**

SHUT DOWN PROCEDURES

- 1) Turn **OFF** the on/off switch
- 2) Pull trigger on gun to release pressure in the system
- 3) Turn off at the wall socket.

Remember:

- Check oil level regularly in the motor and the pump
- Use Pump oil only in the pump (not motor oil)
- Sit machines on level ground when in use, as they vibrate and move when the motor is running
